FOR IMMEDIATE RELEASE

CHIPS Named Distributor for AppGuard Endpoint Protection in North America

White Bear Township, MN - CHIPS, a leading technology company specializing in cybersecurity solutions, is thrilled to announce its appointment as the distributor for AppGuard, a cutting-edge endpoint protection product, in North America. This strategic partnership will enable CHIPS to bring unparalleled security measures to businesses and organizations across the region, reinforcing their commitment to safeguarding against cyber threats.

As cyber-attacks continue to evolve in complexity and scale, the need for robust endpoint protection solutions has become paramount. AppGuard has emerged as a trailblazer in the cybersecurity industry, boasting a unique approach that prevents both known and unknown malware attacks from compromising endpoint devices. Its innovative technology has garnered recognition from industry experts and positioned AppGuard as a trusted name in the field.

By joining forces with AppGuard, CHIPS will empower organizations of all sizes to fortify their networks and defend against the ever-evolving landscape of cyber threats. As the distributor for North America, CHIPS will provide comprehensive access to AppGuard's advanced endpoint protection suite, including its groundbreaking zero-trust architecture and real-time threat protection capabilities.

"We are delighted to be named the distributor for AppGuard in North America," said Tony Chiappetta, President of CHIPS. "This collaboration reinforces our commitment to delivering state-of-the-art cybersecurity solutions to our clients. AppGuard's unique approach to endpoint protection aligns perfectly with our mission to provide comprehensive, proactive security measures that mitigate risks and protect against the most sophisticated cyber threats."

In addition to serving as the distributor, CHIPS will also be working closely with Referral Partners, Authorized Resellers, and Indirect Channels to extend the reach of AppGuard's endpoint protection product. This network of trusted allies will enable businesses across various industries to access AppGuard's robust security features and stay one step ahead of potential cyber-attacks.

"As we expand our presence in North America, we recognize the importance of working with reputable partners who share our vision for a safer digital landscape," stated Michael Hewins. "CHIPS' deep expertise in cybersecurity and their commitment to delivering top-notch solutions make them an ideal distributor for AppGuard. We are excited about this collaboration and look forward to jointly addressing the evolving cybersecurity needs of organizations across the region."

With the distribution rights for AppGuard, CHIPS is poised to make a significant impact in North America's cybersecurity market. By combining their expertise with AppGuard's innovative technology, they aim to empower businesses and organizations to navigate the digital world with confidence, knowing their endpoints are fortified against emerging threats.
